HEALTH NUMERIC
REMOTE PATIENT MONITORING

THE POWER TO CONNECT
& COLLABORATE

Health Numeric

HEALTH NUMERIC'S CORE MISSION

Partner and provide home care agencies with a complete Remote Patient Monitoring solution that helps reduces hospital 30 day readmission rates, increase physician to home care agency referrals and improve collaboration between patient's families, home care agencies and physicians .

Health Numeric understands home care agencies need for simple technologies, timely logistics and a Return On Investment (ROI) to being Remote Patient Monitoring (RPM) adopt. We've developed the software platform and partnered with world leading wireless medical device manufacture to offer a RPM solution that's simple to adopt and learn

REMOTE PATIENT MONITORING:
PATIENT CONDITIONS

Remote Patient Monitoring includes a technology ecosystem designed to monitor a range of health conditions. Point-of-care (e.g., home) monitoring devices, such as weight scales, glucometers, blood pressure monitors, spirometers or pulse oximetry monitors and 3G Hub Kited together to send data to the Health Numeric Cloud.

CONDITIONS WE MONITOR

- ❑ Congestive Heart Failure
- ❑ Chronic Obstructive Pulmonary Disease
- ❑ Hypertension
- ❑ Diabetes
- ❑ And more…

Health Numeric

REMOTE PATIENT MONITORING: HOW DO WE DO IT?

❑ A cellular based hub for each patient

❑ Kits preconfigured and paired together (hub and medical devices)

❑ Medical devices send data to hub wirelessly (no cable needed)

❑ Monitoring patient based on condition

❑ Normal, Warning or Critical Notification ranges

❑ Patient Care Circle

❑ Data stored in HIPAA compliant cloud platform

❑ View patient's data via mobile devices

❑ Simple to view patient data web pages
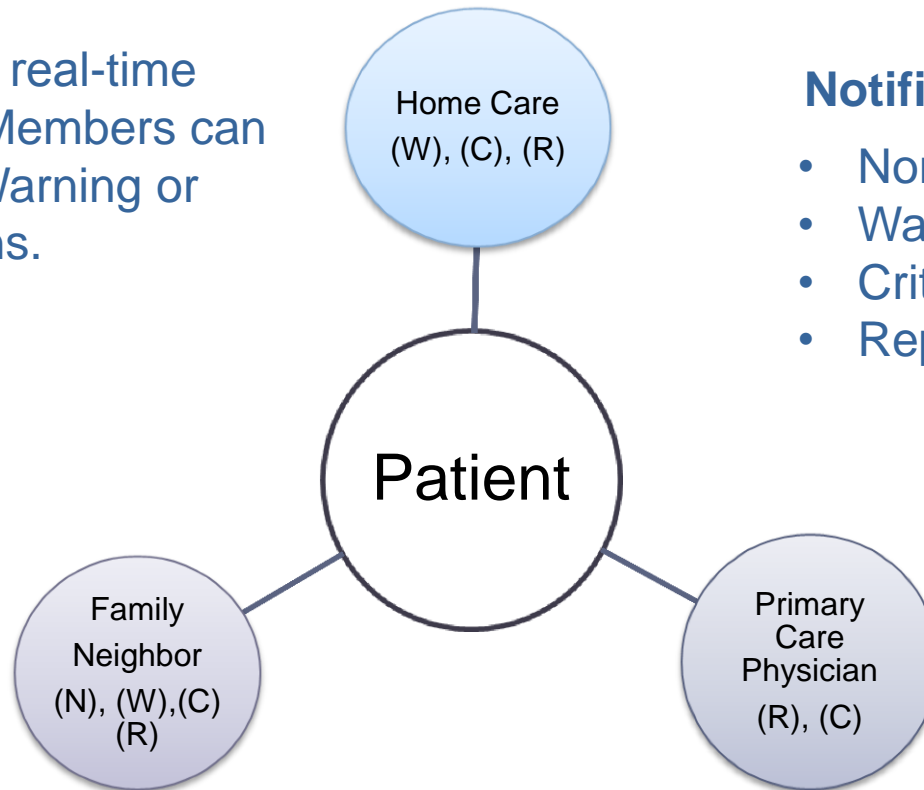

❑ Custom patient data and progress reports

HealthNumeric

REMOTE PATIENT MONITORING:
CARE CIRCLE

Based on patient's real-time data, Care Circle Members can receive Normal, Warning or Critical notifications.

Home Care
(W), (C), (R)

Patient

**Family
Neighbor**
