

Hello,

Congratulations on taking the first step toward participating in Health Numeric's remote patient monitoring (RPM) program. Our RPM program is a model of care designed to improve the coordination of health care with a focus on the patient. We believe that to achieve our goal there must be a partnership between the patient and their care team (Care Circle). Health Numeric remote patient monitoring service has the tools needed to create and strengthen these partnerships.

Health Numeric's remote patient-monitoring technologies will provide you with the tools needed to remotely track the health of your patients at home, collaborate with your patient's Care Circle, and help detect health problems before they lead to readmissions. Health Numeric is your partner and we are committed to helping you and your patients reach a model of "Superior Health Care". We will help assign patients to specific care protocols, interventions and deliver chronic care kits that are tailored to condition or acuity level, which will include measuring vital signs, completing surveys, watching, and educational videos. Our team of nurses will monitor patient alerts and take corrective action quickly. Our nurse staff can also help supplement your staff if your team doesn't have the resources available to focus on the patient's emergent needs.

Remote Patient Monitoring is a critical technology and CMS and private insurers what providers to use this technology, especially during the middle of the COVID-19 pandemic because they enable providers to monitor their patients without having to come into contact with them, thus preventing the spread of the novel coronavirus. They also keep patients with less severe cases out of hospitals, so preserving precious bed space for patients with severe cases.

Medicare, Medicaid, and private insurers are promoting the use of remote patient monitoring by providing new CPT codes. Health Numeric can help you submit bills for RPM services and document patient interaction in your EMR to protect against audits.

To complete Health Numeric's remote patient monitoring enrollment process, please complete the new customer enrollment process on our website.

- Mutual NDA
- Business Associate Agreement
- RPM Management Service Agreement
- Equipment Program

With the continued partnership in Health Numeric's Remote Patient Monitoring program, we hope to optimize your practice, increase your patient's quality of life, and prevent hospitalization.

We look forward to serving you and your practice.

Sincerely,

Health Numeric LLC.
