

Health Numeric Capabilities

Health Numeric is a minority owned, innovative, East Lansing, Michigan based company working to improve health outcomes. We offer a HIPAA compliant, Software as Service platform, broadband internet (Unity gateway) and licensed care providers that deliver virtual care services to patient while in their homes. Our team of Software develops, Network Architect and Artificial Intelligent (AI) Engineers can integrate our real-time data from services into your EMR to create a custom real time dashboard solution that giving health care team the ability to monitor and track patient's health analytics, patient's progress metrics, provide patient support & reminders via our chatbot, and stratify patients based on their health care needs. Our services can also predict negative trends and promote care team collaboration while keeping patients the center of care.

Health Numeric's multidisciplinary health care team, TIGER TEAM can help reduce work demand on clinical staff and improve FQHC's quality measurement in key area such as A1c, diabetes and hypertension management, breast cancer, cervical cancer, colorectal cancer, and chlamydia screening. Our TIGER TEAM can access patients and their data then connect them to our medical support team.
