

**HealthNumeric**

Health Numeric is an innovative East Lansing-based company working to reduce high hospital readmission rates. Our HIPAA compliant cloud platform, along with our Remote Patient Monitoring devices and Chronic Care Management services, give home care agencies, case managers, physicians, nurses, and families access to comprehensive at-home patient monitoring and case management support. This information—obtained in real-time—allow nurses and caregivers the ability to monitor daily vitals, generate reports, send reminders, and receive notifications when measurements go beyond a set range. This type of at-home patient monitoring and case management can quickly identify negative trends, improve care team collaboration, and reduce hospital readmissions while keeping patients at the center of care.

# CHRONIC CARE MANAGEMENT (CCM) AND IN-HOME PATIENT MONITORING

Health Numeric provides the very best Chronic Care Monitoring (CCM) and in-home patient monitoring solution. Once our expert nurse team, partners with your organization and understand your patients' needs, our nurse team will create a custom care plan for each patient and establish an education plan that will help patients reach their personal health goals. Our CCM service includes a RN and Bluetooth enabled medical devices to monitor your patient's chronic condition. All follow up calls and encounters are updated in your EMR.

We ensure your CCM and in-home patient monitoring program is successful and provide the best care for your patients while protecting your budget and priorities.

If you are interested in learning more about CMS's Chronic Care Management and Remote Patient Monitoring programs, call Health Numeric today and schedule a meeting with our team. 1-833-4767 option 0
